SUMMARY

Passionate software engineer with experience in C++, Python, Golang, web development, and backend frameworks. Skilled in algorithms, design patterns, databases, and essential development tools. Also familiar with and interested in system design and software architecture, with an attention to detail. I have achieved some success in programming competitions and am motivated to contribute expertise in innovative software solutions.

EXPERIENCE

Quera

Part-time • 1 yr 10 mos
Tehran, Iran • Remote

- **Course Instructor & Maintainer**

Nov 2022 – Present • 1 yr 10 mos

🏷️ Go, Linux, Laravel, PHP, MySQL, TDD, Git, NoSQL, Docker and familiar with K8s
☰ Designed and developed training courses, projects, and tests; Mentored peers in various technologies

- **Products Owner and Problem Setter at Quera bootcamps (Go)**

Apr 2023 – Jul 2023 • 4 mos

🏷️ Go, Echo, PostgreSQL, GORM, TDD, Linux, Git and agile
☰ As a Product Owner: Analyzed product requirements and oversaw the development process, ensuring team alignment And timely project delivery
☰ As a Problem Setter: Designed problems, projects, and test cases utilizing Go, database interaction with GORM and the Echo.

- **Problem Setter at Quera bootcamps (PHP-Laravel)**

Dec 2022 – Feb 2023 • 3 mos

🏷️ PHP, Laravel, MySQL, Design patterns and Testing
☰ Designing projects to familiarize with design patterns with pure PHP and the final project of an Laravel e-commerce site

EDUCATION

Master of Science - MS, Computer Software Engineering

Sep 2023 - Present

🏛️ Iran University of Science and Technology

GPA: 3.65/4.00

📄 Thesis: cryptocurrency price prediction

Bachelor of Engineering - BE, Computer Engineering

Jan 2019 - Sep 2023

🏛️ Hakim Sabzevari University

🎓 Honors: Third place in free programming

Diploma in Theoretical and Mathematical Physics

Oct 2013 - Jul 2019

🏛️ Sampad

PROJECTS

microservices (Go)

June 2024

-  This project was designed with educational purposes for the final project of the IUST software engineering course and aims to cover a wide range of software engineering topics

Events managing

June 2024

-  This is a backend program written in Go for managing events. Users can sign up, log in, and perform various actions based on their JWT tokens.

GORM

February 2023

-  This project was for the Bale contest where Gorm's ability to participate was important. And in it, building models and relationships between them, as well as scoping and querying were examined

Laravel Quera College CMS Project

August 2022

-  This project was designed for Laravel Quera college course. which was developed in a modular architecture and tried to understand the relationships in Eloquent.

CERTIFICATES

-  Getting Started with Go - Coursera, April 2023
-  Functions, Methods, and Interfaces in Go - Coursera, April 2023
-  Concurrency in Go - Coursera, May 2023

SKILLS

- **Programming Languages:** Golang, Python, PHP, C++
- **Tools & Technologies:** Linux, Git, Docker, Echo, Gin, PostgreSQL, MYSQL, TDD, Laravel, Apache Cassandra, Redis, MongoDB and just a little familiar with K8s
- **Soft Skills:** interested in teamwork, interested in details and learning, Communication, sense of humor, critical thinking, working in different teams

LANGUAGE

- English (Ready for work)
